Have you taken the first dose of the Abortion Pill, (MIFEPRISTONE or RU-486)?

Do you regret your decision and wish you could reverse the effects of the abortion pill? We are waiting to help you! There is an effective process for reversing the abortion pill, called **ABORTION PILL REVERSAL**, so call today! **Call us** right now, so we can talk with you and offer you help.

We know that an unplanned pregnancy can be scary and many women make decisions to abort their babies when they are terrified and stressed. We know that after some time thinking about it, many women would like to change their minds about a **CHEMICAL ABORTION. IT MAY NOT BE TOO LATE, IF YOU CALL QUICKLY.** Please...talk with one of our nurses who can guide you towards reversing the effects of the abortion pill. It's the right thing to do...and we will help you every step of the way. Call now.

What are the Side Effects of the Abortion Pill?

Mifepristone (RU486) is a very strong drug and you may experience side effects after taking it. The side effects vary from person to person and no two women's experiences are alike. Check out the list below to have a better understanding of how the drug may affect you.

COMMON SIDE EFFECTS

SEVERE	LESS SEVERE
Uterine Cramps	High Blood Pressure
Bleeding Not Related to Menstrual Period	Dizzy
Backache	Joint Pain
Stomach Cramps	Low Energy
Low Amount of Potassium in the Blood	Fluid Retention in the Legs, Feet, Arms or Hands
	Loss of Appetite
	Head Ache
	Vomiting
	Diarrhea

INFREQUENT SIDE EFFECTS

SEVERE	LESS SEVERE
Infection	Indigestion
	Chronic Trouble Sleeping
	Fever

IF IN TIME THIS PROCESS CAN BE REVERSED
If you are seeking immediate assistance, please call our 24/7 hotline:

(225) 229-5826

For non-emergency inquiries, please call our non-urgent office line: (225) 272-3680

How the Abortion Pill Works

Mifepristone is also known as the abortion pill or **RU486** and is prescribed by a doctor within the first seven to nine weeks of pregnancy. Most women don't really know how it works. Many physicians will tell you that mifepristone (RU486) is a "light procedure";, or is "relatively quick" and "easy." That's not the truth. It isn't light, quick, or easy.

Mifepristone (RU486), is a drug that blocks the effects of progesterone—a hormone your body needs to grow a healthy baby.

Mifepristone blocks the nurturing effects of progesterone which leads to the death of the developing baby, the embryo or fetus.

The Abortion Pill Process

- A doctor will give you a physical exam to determine if you are eligible for this type of medical abortion procedure.

CAUTION: you are not eligible if you have any of the following: ectopic pregnancy, ovarian mass, IUD, corticosteroid use, adrenal failure, anemia, bleeding disorders or use of blood thinners, asthma, liver or kidney problems, heart disease, or high blood pressure

- You may be given antibiotics to prevent infection.
- You will be given an oral dose of mifepristone during your first office visit.

It may not be too late
If you've taken the abortion pill it may not be too late.

Call 225-229-5826 right away.
We can help you!

The Abortion Pill Process (CONTINUED)

Misoprostol tablets are taken orally or inserted vaginally about 36 to 72 hours after taking the **mifepristone**. The tablets will cause painful contractions and expel the remains of the baby. This process may take a few hours or as long as a few days. You will need to be examined by your doctor two weeks later to ensure the abortion was complete and to check for complications.

The procedure is unsuccessful approximately 5-10% of the time with the potential of requiring an additional surgical abortion procedure to complete the termination.

Make sure you also read up on the many side effects and risks of **mifepristone** and **misoprostol**.

“When Rhonda, her Mother and Gary saw in utero their baby with a beating heart, they all began to cry.

DANA

"I always thought I would never make the decision of abortion, but it came to that... I was so sad, I felt so sick, and I was already regretting my actions... I decided to look for help, and I Googled Abortion Pill Regret. A website popped up and had a phone number to call. I called and talked to a lovely woman named Debbie, and she was dedicated to help me and showed such compassion... I am so happy that there was help out there for me and my baby. I am so very thankful for the nurse that took my phone call and the doctor who didn't turn his back on me -- it is because of them that I have my precious baby boy here with me." Read the Story

Percentage of Services provided by LCP Partners

Over 95% of our clients describe their experiences as excellent. Many write comments like these:

- Staff were pleasant, helpful and the information was useful.
- Helped me to get the resources I needed
- Great experience, very helpful staff
- I enjoyed the nurses, they were helpful in answering questions and information that helped me make my decision.

From the Executive Director

It's with great pleasure that I report that during the past eight months, the *Life Choice Project* reached **1,944** pregnant women and women who may have thought they were pregnant. We've provided over **12,094** services to support their health and well-being in their choice to protect the lives of their unborn babies.

Our six crisis pregnancy clinic and center partners provide critical and much needed resources for pregnant women, their partners and their families during this vulnerable time in their lives. Through the continued funding from the Louisiana Department of Children and Family Services, Alternatives to Abortion Initiative, the *Life Choice Project* partners are able to fulfill our mission of providing a safe, non-judgmental, client-centered environment that changes the hearts and minds for generations upon generations.

For over 13 years, the *Life Choice Project* has provided a number of free services to our clients. These services include: pregnancy tests, ultrasounds (available at some facilities), counseling, adoption referral assistance, maternity support (diapers, formula, baby wipes, car seats, infant and maternity clothing), *Sources for Women 24-hour Help Line* calls, and parenting classes that encourages the active engagement of dads, are just some of the options available to all our clients.

On behalf of the Board of Directors of Caring to Love Ministries and myself, we are thankful to all who help us provide these needed resources and do know that because of that, you are playing a key role in changing the hearts and minds of our clients and their children for generations.

With gratitude,

Deborah Miller

2016 Annual Report

MISSION

The Life Choice Project exist to empower women and men to make life-affirming decisions regarding pregnancy, as well as the value of abstinence before marriage through counseling education and compassionate care.

Impact and Outcomes

Life Choice Project Services (July 1, 2015 to February 28, 2016)

The Life Choice Project's Coordinated Prenatal Care Services (CPCS) service delivery models offers twelve (12) optional service components. LCP partner centers and clinics offer pregnant women and their families support and encourage their active participation throughout their pregnancy for their health and that of their unborn child. During this period, **1,944** women received services through the LCP of which, nearly 20% of the women had negative pregnancy tests results. Overall, we've exceeded projections for each service delivery component.

Other program results

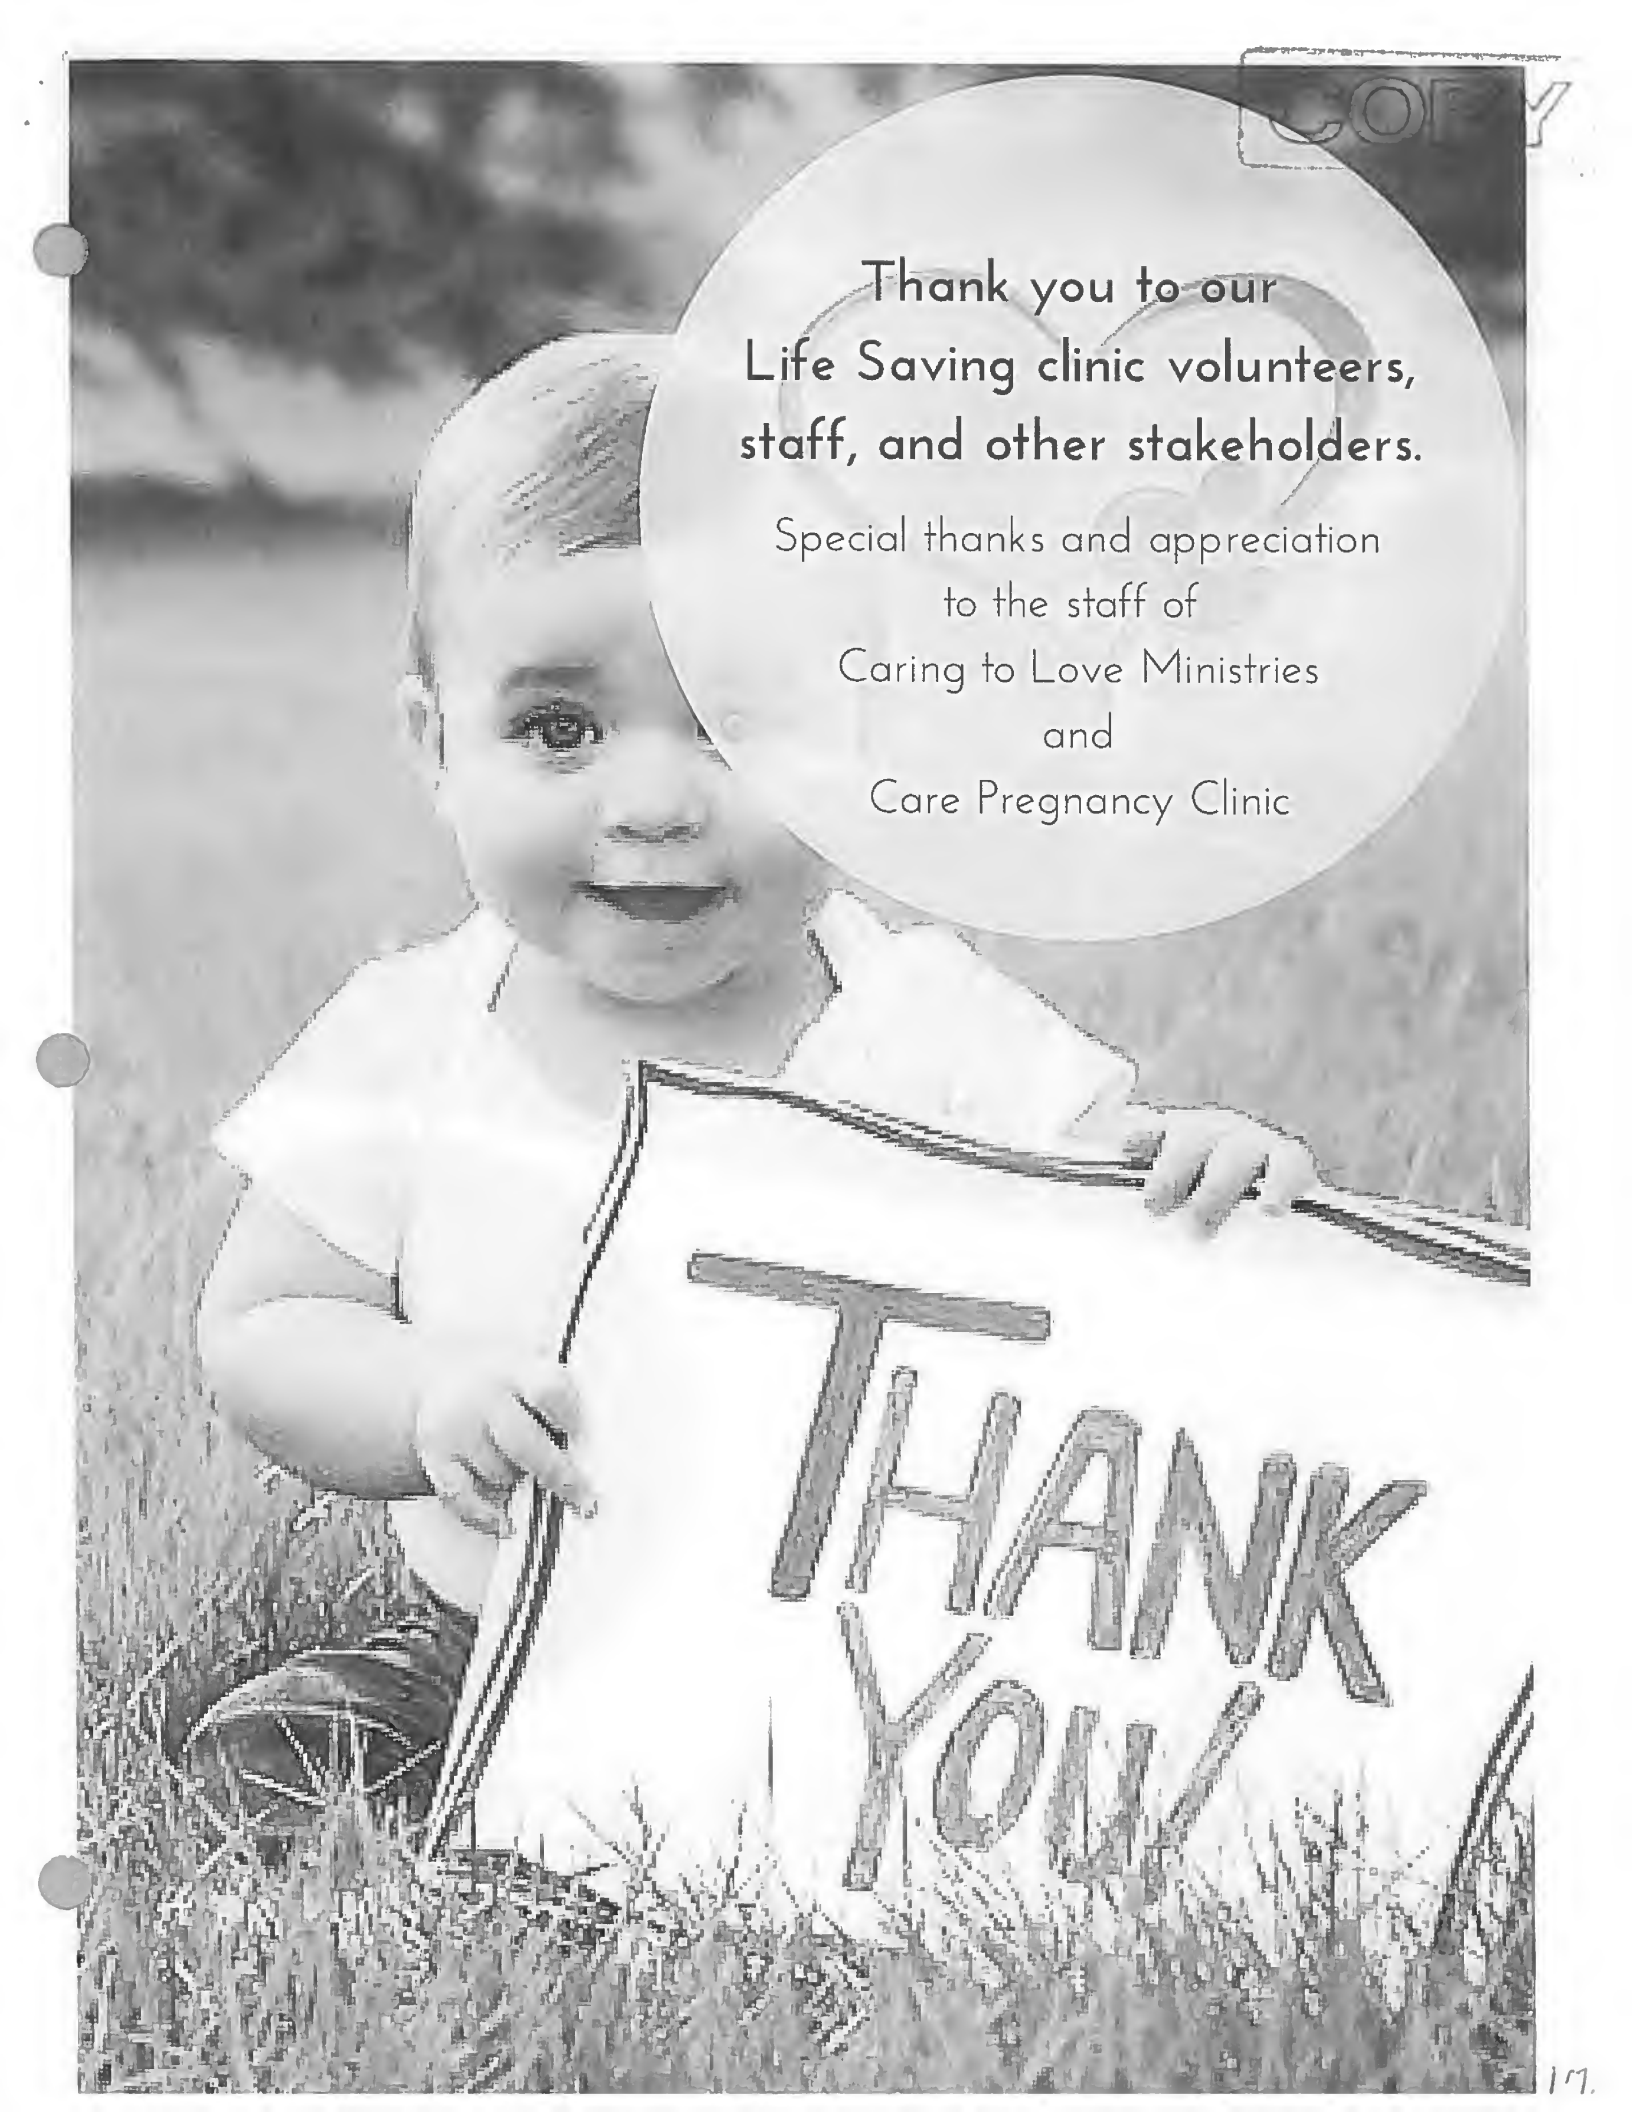

- * Increased clients awareness of the importance of early entry into prenatal care for healthy pregnancy.
- * Improved linkage to medical, social, community, and government agencies.
- * Increased relationship education (abstinence) to women who thought they were pregnant
- * Calls for information and referral received through use of Sources for Women 24-hour help line. Received 2,357 total calls.
